Profile

Firstly, I define myself as a hard-working, committed and curious person, with a great desire to add value to a company. Always willing to learn and live new experiences.

On the other hand, I am constantly learning new technologies and programming tools, in order to putting it into practice, thus improving my portfolio.

Employment History

ATM Software Engineer Oct. 2022 - Jan. 2023

Java Software Development in an international project related with Air Traffic Management (ATM).

GNSS Trainee at GNSS Academy Jan. 2022 - May. 2022

I acquired the necessary knowledge on GNSS thanks to the development of an end-to-end Python project involving Real Data Campaigns, Tools Execution, Signal processing, and Ranging and User Navigation performances.

Education

Industrial Electronic and Automatic Engineering, Universidad Politécnica de Valencia Sept. 2016 - Jun. 2022

My Final Degree Project was about the improvement in the vertical profile automation of a flight simulator software with Java language.
